

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

will be printed in the next list of members as they appear on the wrapper of this BULLETIN.

President Strong's address will be Lake Forest, Ill., until further notice.

PUBLICATIONS RECEIVED.

The "special" nature of BULLETIN No. 15, prevented the acknowledgement of publications in that number, hence the present list is both late and longer than usual.

The Blue Jay and Its Food, by F. E. L. Beal, Assistant Biologist, U. S. Department of Agriculture. [Reprint from the Year-book of the Department of Agriculture for 1896, pp. 197 to 206 inclusive, with three cuts in the text.] The evidence brought forth by the careful investigations conducted by Professor Beal may be summed up in his closing sentence. "In fact, the examination of nearly 300 stomachs shows that the blue jay certainly does far more good than harm."

Bulletins Nos. 84, 85, 86, and 79, of the Alabama Agricultural Experiment Station, of the Agricultural and Mechanical College, Auburn. Valuable contributions to Horticulture and related subjects, by officials of the station.

Bulletin No. 20, Department of Agriculture, Kansas State Agricultural College, Manhattan, Kan. A compilation of experiments with wheat.

Bulletins No. 80, 81, and 82, Ohio Agricultural Experiment Station, Wooster, Ohio. Valuable contributions to Horticulture and related subjects, by officials of the station.

Birds, Vol. II., Nos. 1, 2, and 3, July, August, and September, 1897. It could have no greater praise than mention of its immense and constantly increasing circulation. Our constant surprise is that there are not more inferior pictures, realizing, as we do, that perfect subjects for illustrations are not always obtainable. The species selected for representation in the September number are among the more difficult ones. Here we notice that the chief defect is a lack of light in the eye, which is also more or less in evidence in previous plates. A steady improvement is evident throughout the magazine, and we have only hearty words of praise for the good work it is doing in putting the birds before the eyes of an appreciative public whose need of just such a magazine is made clear by their eagerness to know the birds through its pages.

The Auk, Vol. XIV, No. 3, July, 1897.

The Iowa Ornithologist, Vol. III, No. 3, July, 1897.

The Osprey, Vol. I, Nos. 10, 11-12, Vol. II, No. 1, June, July, August, September, 1897.

The Museum, Vol. III, Nos. 8, 9, 10, 11, June to September, 1897.

The Oologist, Vol. XIV, Nos. 6, 7, 8, 9, June to September, 1897.

The Observer, Vol. VIII, Nos. 6, 7, 8, June to August, 1897.

Popular Science, Vol. XXXI, No. 4, April, 1897.

Recreation, Vol. VI, No. 6, June, 1897.

Stories from Nature, Vol. I, No. 4, September, 1897.

Microscopical Bulletin, Vol. XIV, No. 3, June, 1897.

The Nidologist, Vol. IV, No. 9, May, 1897.
